

IF-SKOLAN (IF-SCHOOL) is the main training centre for technical insulation in Sweden. We've been training professionals for more than 25 years. [www.ifskolan.se](http://www.ifskolan.se)

We have training centres all over Sweden from the south to the north like Stockholm, Gothenburg, Malmo and Ornskoldsvik and we also have partner schools at a number of other locations.

We educate and train apprentices, high school students, consultants, technical insulation teachers and students attending work school programmes and we currently educate about 200+ students attending our training programmes.

IF-SKOLAN is a school run by the insulation companies in Sweden which are members of the industry organisation IF (The Insulation Companies Association), Sweden.

Our goal is to educate and guarantee that all professionals working with technical insulation in Sweden are at the peak of their knowledge and craftsmanship according to the implementation standards of technical insulation set by IF.
